EDUCATION

- **Inderprastha Engineering College** **Aug 2024 – Present**
B.Tech in Computer Science Engineering | CGPA: 7.01
Ghaziabad, UP
- **Deep Memorial Public School** **2023**
Class 12th – 75% | CBSE
- **Deep Memorial Public School** **2021**
Class 10th – 88% | CBSE

EXPERIENCE

- **Co-Editor / Core Team Member – MUNify** **2024 – 2025**
Content Strategy & Digital Growth Operations *Faridabad, Haryana*
 - Owned end-to-end content workflows across editorial and campaign verticals, improving execution throughput by ~15%.
 - Coordinated with marketing and design teams to maintain **brand consistency across multi-platform digital channels**.
 - Drove digital promotion strategies that measurably improved event discovery and delegate engagement metrics.
- **Prep-BE Competition Finalist** **2024**
National Level Engineering Competition *India*
 - Selected among top student teams nationwide for solving time-bound analytical and algorithmic problem statements.
 - Demonstrated strong **technical reasoning and data-driven decision making** under competitive conditions.

PROJECTS

- **Stock Trading Simulation Platform | React, Node.js, Express, MongoDB, JWT, Chart.js** **2024**
 - **Led a team of 4** to build a full-stack MERN simulator with virtual fund allocation, live portfolio tracking, and real-time charting.
 - Implemented **JWT-based authentication**, secure session management, and a responsive dark-themed UI using Tailwind CSS.
 - Designed RESTful API architecture handling trade execution, portfolio state, and user account management.
- **AI Based Dropout Prediction System | Python, Random Forest, Pandas, NumPy, Matplotlib** **2025**
 - Built end-to-end ML pipeline using **Random Forest classifier**, achieving ~80% **prediction accuracy** on student dropout datasets.
 - Applied feature engineering, normalization, and cross-validation to improve model robustness and generalization.
 - Generated visual insights via Matplotlib, improving interpretability of model outputs for decision-making.

TECHNICAL SKILLS

- **Languages:** JavaScript, Python, Java, C, C++, SQL, HTML, CSS
- **Frameworks & Libraries:** React, Node.js, Express.js, Tailwind CSS, NumPy, Pandas, Matplotlib
- **Databases & Tools:** MongoDB, Git, GitHub, VS Code, IntelliJ IDEA, Android Studio
- **Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems
- **Concepts:** Machine Learning, REST APIs, Data Analysis, Statistical Modelling
