Internship Offer Letter

Student Name : Ayush Gupta
Stream : B.Tech
Branch : B.Tech(Computer Science and Engineering)
Institute Name : Inderprastha Engineering College
Internship Domain : AI in Cyber Security
Internship Duration : June 2026 - August 2026
AICTE Student ID : STU69d271601ed3a1775399264

We are pleased to inform you that you have been selected for the 8-Week **AICTE – EduSkills Virtual Internship Program**.

During this internship, you will learn and demonstrate industry-relevant skills that will enhance your employability and strengthen your confidence in the subject area.

The program is designed to provide structured learning combined with practical exposure.

Internship Structure & Evaluation:

- The internship will follow a **week-wise structured learning plan**.
- You will be required to complete **weekly assessments** to track your progress and understanding.
- Certain modules will require submission of **project documentation and assignments**.
- In the final week, you must appear for a **Final Assessment Test**.
- The final grade will be based on your overall performance, including weekly assessments, project submissions, and the final test.

Upon successful completion of all required steps and assessments, you will be awarded a **Virtual Internship Certificate**.

Please note that this offer letter will be considered valid only after the successful completion of the internship program and fulfillment of all assessment requirements, including obtaining the final completion certificate. Without the final completion certificate, this offer letter shall not be treated as a valid document for any official purpose.

The week wise Structure of the Internship is as Follows:

Week	Module	Description
Week 1	ML Foundations & Ethical AI in Cybersecurity	Introduction to ML concepts for cybersecurity, CyberAI homelab setup, classification & clustering basics, and ethical AI practices including bias, privacy, and governance.
Week 2	Cyber Data Engineering & Attack Detection	Data preprocessing, feature engineering, dimensionality reduction, understanding malware, phishing, DDoS attacks, and AI-driven detection & prevention strategies.
Week 3	Deep Learning & Reinforcement Learning for Cyber Defense	Deep learning architectures (CNNs, RNNs/LSTMs, Transformers) for threat detection and reinforcement learning for adaptive defense and automated incident response.
Week 4	Explainable & Generative AI in Cybersecurity	Explainable AI (LIME, SHAP), generative AI applications (GANs, LLMs), AI-powered attack simulations, and defensive strategies against AI-driven threats.
Week 5	AI-Powered IDS & SIEM Systems	Building and deploying AI-based IDS/IPS integrated with Suricata, enhancing SIEM systems through intelligent log analysis, threat hunting, and automated response.
Week 6	Threat Intelligence & AI-Driven SOAR	AI-based threat intelligence platforms, IOC extraction, predictive threat analysis, and automated security orchestration (SOAR) workflows.
Week 7	AI for Cloud, Endpoint & Vulnerability Security	AI-driven cloud monitoring, container security, EDR/XDR systems, behavioral analysis, vulnerability prediction, exploitability scoring, and proactive patching strategies.
Week 8	Insider Threats, DFIR & Future Trends & Capstone Project	Insider threat detection, user behavior analytics (UBA), AI-powered digital forensics & incident response (DFIR), and emerging trends including quantum-resistant AI and human-AI collaboration.
Internship Grade Point Assessment		

Note: There is no stipend associated with this internship.

We congratulate you on your selection and wish you a successful learning journey.
